

MOTION & CONTROL

**NSK**

# The industry's choice

NSK is a market leading Global supplier of Ball and Roller Bearings to the Automotive Industry.

From Air Conditioner to Alternator, Clutch to Compressor, Water Pump to wheel bearing, NSK supply leading edge technology to ensure safety and performance for today's vehicles.

NSK Group demonstrates its leadership in technology by consistently introducing groundbreaking technologies such as Continuously Variable Transmission (CVT) and our Electrical Power Assisted Steering System, EPAS™.

From initial concept, through design and development to final assembly, NSK provide the specialist technical resources to ensure the most up-to-date, cost effective and reliable solutions.

**BELT TENSIONER PULLEY**  
NSK pulleys help satisfy the increased power output demands of modern vehicles.

**INTEGRATED HUB BEARING UNITS**  
Our comprehensive programme includes units with integral inner and outer mounting flanges, providing more compact and reliable solutions.

**SEALED CLEAN TRANSMISSION BEARINGS**  
Sealed Clean ball and roller bearings support the demands for increased engine output, compactness, longer life and improved reliability.
